

Dear Dizzy Feet Foundation

I am growing exceptionally well at the Jacqueline Kennedy Onassis School. My training is very difficult but beneficial to my career. I enjoy training at the J.K.O school. All the teachers here are very nice and push me so I can be a better dancer. I know training at the J.K.O school is a privilege and I am very grateful for the opportunity. Class at J.K.O is very challenging I look forward to class everyday at a very special school that has amazing and wonderful teachers. It is a great environment.

I attend Fiorella H. LaGuardia high school. I dance in school for 4 periods because it is a school for the performing arts. Dancing in school as well at J.K.O could be a difficult task but it will help me become a stronger dancer. Academics at my school are very important and you must keep up your grades. I am doing pretty well in school and find history to be the most interesting subject. I believe in order to improve your future you must know more about your past. I always thought that it's good to know about your country and its history in the world. I study very hard so I can maintain a good average.

I also assist with the children's division on Saturday mornings. I help with Primary A and Ballet 3. Primary A is the youngest class in the school and their ages range from three to five, helping with the kids has been a wonderful experience it has taught me patience and responsibility. Every child is different from the other they could be shy, energetic or outgoing. Volunteering on Saturdays has also helped me to learn how to work well with others and you must be able to work with all kinds of people. The level three class is mainly girls. They are a hard working dedicated class.

Helping other kid's helps me get a head start on what I am going to be doing after my dance career. Once again thank you Dizzy Feet Foundation for all you have done for me and I will continue down the path I am going and will stay focus and determined.

Cordially yours,  
*Chauncie Parchment*
